

The original trial-level data (GregsARVdata2.txt) is consistently formatted except for the Feedback Time Local column, which contains date/times in three different formats and additionally sometimes a date and sequence number. Date and time formats were transformed to standard formats using the Excel spreadsheet *Greg Ks data - dates converted.xlsx*. The *fixed* worksheet was saved in csv format as *GregsARVdata2-dates-fixed.csv*. (This transformation was performed by Adrian Ryan.)
