

Code book for GregK-Session-Data.csv

Column	Description
Session	A sequential session number.
RV.DateTime.MST.Min	The date and time of the first RV trial in the session.
First.Feedback.DateTime.MST	The date and time of the first feedback for the session.
Last.Feedback.DateTime.MST	The date and time of the last feedback for the session.
Feedback.Period.Mins	The period between the first and last feedback for the session, in minutes.
Precog.Mins	The period between the first RV trial in the session and the first feedback for the session, in minutes.
First.Feedback.Date.MST*	The date of the first feedback for the session.
Last.Feedback.Date.MST*	The date of the last feedback for the session.
Feedback.Period.Days*	The period between the first and last feedback for the session, in days.
Precog.Days	The period between the first RV trial in the session and the first feedback for the session, in days.
N	The number of trials in the session.
hits	The number of successful trials in the session.
z	The z-score for the session
RV.SWS	The mean SWS for trials in the session, calculated from the data in the original file.

* These columns included to cater for cases where a sequence number was provided instead of a feedback time.
