Code book for GregsARVdata2-dates-fixed.csv

Column	Description
RV Date MST	RV date local MST
RV Time MST	RV time local MST
Feedback Date MST	Feedback date local MST
Feedback Time MST	Feedback time local MST
Feedback Seq	
Conf.Score	Confidence score
Right.Wrong	right (1) / wrong (-1)
RV.SWS	RV solar wind speed
FB.SWS	Feedback solar wind speed

To convert to UTC, add 6 hours for summer and 7 for winter. The times are local MST and have been adjusted to include DST.

There are some small discrepancies between the data file and the JP write up. The data in the supplied file are correct: the trials are exported directly out of the original database.
